

INFORMATION FOR INVESTORS

The qualified investor fund specializes in investments in real estate projects within the Central European region — specifically the Czech Republic, Slovakia, and Austria — at various stages of permitting or construction. The investment strategy primarily focuses on acquiring residential buildings and development zones for the construction of family and apartment houses in locations with strong demand for quality housing.

Investments are made through indirect ownership of properties, their leasing, or development and subsequent sale. The fund also allocates capital through secured loans, borrowings, and equity stakes in its real estate companies.

The portfolio of real estate companies owned by the fund includes projects aimed both at capital appreciation through development and sale, as well as income-generating properties with regular rental income.

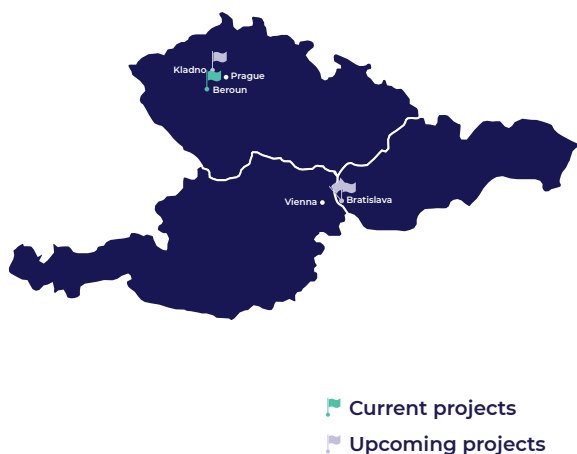

The fund's goal is to achieve attractive and stable returns by combining rental income with profits from the sale of residential projects. It actively seeks opportunities with growth potential, especially in urbanizing areas.
